

PROFILE

Backend-focused Software Engineering undergraduate with strong foundations in algorithms and object-oriented programming. Experienced in building scalable backend systems, REST APIs, and secure applications using NodeJS, Java, Python, and MongoDB. Interested in data engineering and distributed systems.

PROJECT EXPERIENCE

- Facial Intruder Alert System

Oct 2024

- Python, opencv, numpy, ctypes - **Backend & cv2 Integration**
 - Processed real-time image data streams and system-level events, demonstrating foundations in data handling, system design, and backend processing.
 - GitHub:** [View Source Code](#)
- Secure Mail Client Application

Jan 2025

- Python, Flask, hotmail, Triple DES, AES - **Backend & Frontend**
 - Enabled Triple DES & AES encryption for secure email via Hotmail (IMAP/SMTP) with a custom UI for managing encrypted messages.
 - GitHub:** [View Source Code](#)
- AI Code Vulnerability Scanner

May 2025

- Python, Olama, numpy, ctypes - **Backend & Pattern Matching**
 - Built a rule-based analysis pipeline to process source code data and generate structured vulnerability reports for decision-making.
 - GitHub:** [View Source Code](#)
- Blogging Platform

Aug 2025

- NodeJS, ReactJS, MongoDB - **Full stack**
 - Designed and developed a scalable full-stack application using MongoDB NoSQL for efficient data storage, RESTful APIs, and backend scalability. Implemented secure authentication (bcrypt), role-based access control, and optimized data models for performance.
 - GitHub:** [View Source Code](#)

ACHIEVEMENTS

- Academic Excellence Award** for the Year 2024 - 2025
- 2nd Prize** - Awarded as Best project for the Year 2024 - 2025
- 1st Prize** - Awarded as Best project for the Year 2023 - 2024
- 1st Prize** - Proof of Concept (AI Code Vulnerability Scanner)
- 2nd Prize** - Codeathon in Kongu Engineering College

AREA OF INTEREST

- Database Management System
- Backend & Web Development
- Data Structures & Algorithms

EDUCATION

Kongu Engineering College,
Perundurai

- B.Tech Information Technology
- Expected Graduation: Spring 2027
- GPA: 8.98 / 10.0

INTERNSHIP

Matrimony.com - Full stack Trainee

Aug 2025 - Present

Technology : NodeJS, ExpressJS, AngularJS, MongoDB

Worked on backend services using MongoDB NoSQL database, contributing to API development, data storage, and scalable workflows while collaborating with cross-functional teams

CERTIFICATION

- Multithreading in Java - Jul 2025
- Python Web Developer - Jun 2025
- AWS Cloud Practitioner - Feb 2025

SKILLS

- Technologies** - Java, NodeJS, Python, Flask, C, HTML
- Backend & Database** - MongoDB, NoSQL, SQL, REST APIs, Authentication, Authorization
- Data** - Data Structures, Algorithm, Database Management System
- Framework & Tools** - ExpressJS, Flask, Git, Github, VS Code, Netlify
- Soft skills** - Adaptability, Collaborative Working, Time Management, Communication
